# Sherwood Seabrook
Front End Developer

## Hello!

My name is Richard **Sherwood** Seabrook. I have recently earned my "New Media Design & Web Development" Diploma from the British Columbia Institute of Technology. I specialize in transforming design concepts into seamlessly functioning interfaces, leveraging my proficiency in a diverse range of modern web technologies such as HTML5, CSS3, JavaScript, and responsive design principles. With an unwavering commitment to detail, strong problem-solving skills, and a dedication to staying current with industry trends, I consistently deliver digital solutions that balance aesthetics with functionality.

## Work Experience

### JK's Bicycleitis Sept. 2023 – present
*Freelance Client*

My first freelance contract was to design and build a website for this bicycle shop. The site has gone live now and I remain on retainer for updates & troubleshooting.

- Design a professional looking website to showcase the client's products
- Develop a PHP app that allows the client to create and maintain inventory items in a database
- Develop a pixel-perfect front end that matches the client-approved design
- Provide a staging environment for extensive QA testing and troubleshooting
- Deploy a fully populated and functional product to my client's domain

### Burst Creative Group May 2023 – present
*Intern / Subcontractor*

Burst took me on as an intern as I completed my New Media program at BCIT. I worked in-office and remotely for 10 weeks, and have subsequently worked on a contract basis.

- Work collaboratively with the development team to build out Wordpress-based websites based on designer prototypes
- Integrate plug-ins and 3rd party applications to achieve client specs
- Perform extensive QA testing and revisions
